

RCM Sections Update

Division 09 – Finishes

Section 09915 Painting

Beginning NOTE:

Accept revision of NOTE, “This broadscope section covers the general requirements, materials, surface preparation, material preparation, and coating systems for exterior and interior on-site painting. For harsh indoor environments (any area subjected to chemical and/or abrasive action), and all outdoor installations, reference Section 09960, “High Performance Coatings.”” as is worded.

Section 09960 High Performance Coatings

Beginning NOTE:

Accept revision of NOTE, “This section covers special coatings as required for harsh indoor locations or operations (any area subjected to chemical and/or abrasive action), and all outdoor installations.” as is worded.

Article 2.2 Epoxy Coatings

Accept revision of NOTE, adding “UV resistance,” toward end of first paragraph.

Article 2.3 Polyurethane Coatings

Accept revision of NOTE, adding “UV resistance,” toward end of first paragraph.

Section 09970 Coatings For Steel

Article 3.2.3 Dry-Film Thickness (DFT)

Add, “Coating System No. 2:” in article between “c. Second Coat...” and “a. Inorganic Primer Zinc:,”
